

St Helen's Long COVID Service

Mersey Care
NHS Foundation Trust

Community and Mental Health Services

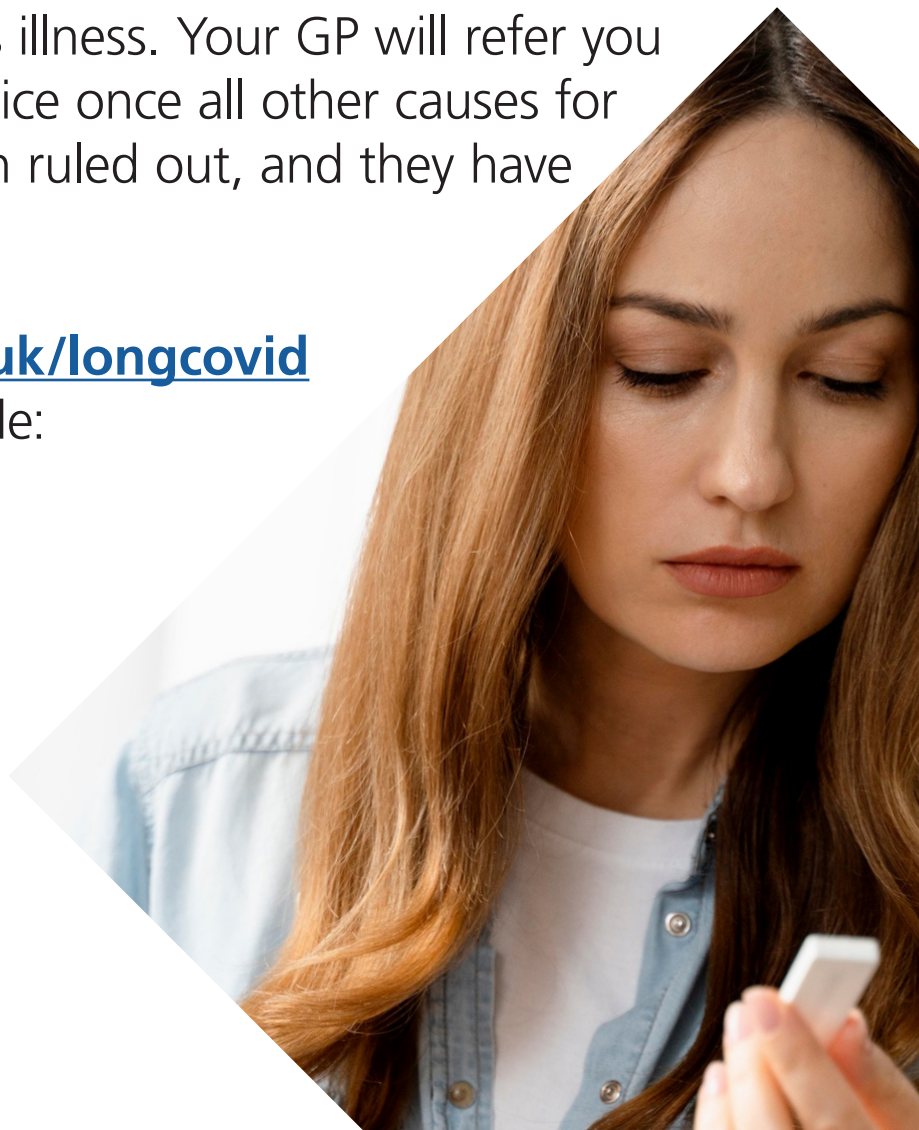

Do you have any ongoing symptoms which you think may be related to COVID-19?

Many people make a full recovery after a coronavirus infection. However, for some, the illness can last longer and is referred to as 'Long COVID'.

You can experience Long COVID even after a mild or symptom free coronavirus illness. Your GP will refer you into the Long COVID Service once all other causes for your symptoms have been ruled out, and they have diagnosed Long COVID.
